BULLION SHIPMENTS WELL MAINTAINED AT TONOPAH BELMONT

Again this week another very satisfactory bullion shipment left the mill of the Tonopah Belmont Development, representing the clean-up for the first two weeks of November. The shipment of the precious metal was made up of 68 bars, with an estimated value of \$145,000.

Both mine and mill are working at capacity and presenting nothing out of the best in accomplishment. Work underground is proceeding on seven different levels with good results.

The official report of development performed at the property during the week ending Friday, November 25, 1921, is as follows:

"1000 Level—East drift 733, off east drift 729, stopped temporarily. Raise 20, off west drift 728, 729 vein, in 2 feet of low-grade ore. Northwest crosscut 702, off east drift from raise 5, prospecting in Mizpah trachyte.

"900 Level—Northwest crosscut 5018, off west drift 502, prospecting in Mizpah trachyte. Northwest crosscut 5049, off west drift 5002, prospecting for faulted segment of the Shearwater vein.

"900 Level—West drift 9025, off northeast crosscut 928, Favorite vein, 2 1/2 feet of good ore. West drift 9089, off west drift 9082, Mizpah vein, face of low-grade ore. Raise 92, off north crosscut 911, running for mining purposes. Intermediate east drift off raise 75. Rhyolite vein, 2 feet of milling ore.

"1000 Level—South crosscut 10071, off east drift 10005, prospecting in Mizpah trachyte. Raise 117, off east drift 1004, prospecting footwall of Mizpah fault. Raise 118, off north crosscut 1008, out Mizpah fault vein and shows 2 1/2 feet of milling ore.

"1100 Level—South crosscut 1150, off southwest crosscut 1147, prospecting in Montana breccia. Northwest crosscut 11002, off west crosscut 11001, prospecting for South vein, face in glassy trachyte. South crosscut 11003, off west crosscut 11001, prospecting for Occidental vein. West drift 1108, off south crosscut 1150, stopped. East drift 11007, off south crosscut 1150, stopped. Raise 123, off south crosscut 1198, prospecting for Rescue vein.

"1100 Level—South crosscut 35, off east drift from 1056 winze, prospecting footwall of Mizpah fault, in Mizpah trachyte. North crosscut 38, off west drift No. 2 from north crosscut 6, prospecting for faulted segment of Favorite vein. Raise 49, off east drift rhyolite, Rhyolite vein, 2 feet of fair ore.

"1200 Level—South crosscut 1331, off east drift from Belmont shaft, prospecting footwall of the Belmont vein, in Mizpah trachyte."

GOLD ZONE DIVIDE CO. SHOWING RESULTS BY ITS DEVELOPING WORK

The work done on the Gold Zone since September 1 has had very important results. On this date the management decided to further explore the 500 level before extending the drifts and crosscuts on the lower levels. It had been the generally accepted opinion among geologists that no ore would be found above the 500 level owing to the intrusion of the tuffa through the vein.

However, an experimental raise was decided upon from the 500 level to the 300 level to prove whether or not this theory was correct. Accordingly work on the 900 level was temporarily discontinued and a raise known as 506 raise was started 105 feet southeast of the Gold Zone Divide side-line.

This raise passed through the tuffa at a point 21 feet above the level and a streak of ore 12 inches in width, sampling \$66 a ton, was encountered within the next 10 feet. This ore now has a width of 7 feet which samples \$48.10 across its full width.

"Raise 506 was extended up 200 feet to hole into the drift on the vein on the 300 level, and other points were selected for raises, one northwest of 506 raise at a distance of 106 feet, and one southeast at a distance of 110 feet, making a total distance on the vein of 216 feet.

The raise to the northwest, known as 512 raise, shows 4 feet of \$18 ore at a distance of 28 feet above the level, and the raise to the southeast, known as 503 raise, shows 5 feet of ore which samples from \$42.50 to \$55 a ton at a distance of 10 feet above the level. A shipment of 73 tons of ore in October

RATES PREJUDICIAL TO DOUGLAS, ARIZONA

(By Associated Press)

WASHINGTON, D. C., Nov. 26.—Class and commodity rates from California points to Douglas, Arizona are held to be prejudicial to Douglas by the Interstate Commerce commission to the extent that they exceed rates in effect from the same points to Bisbee, Arizona.

HARD LIQUOR SEIZED FROM MINE SWEEPER

(By Associated Press)

PORTSMOUTH, Va., Nov. 26.—The naval mine sweeper Redwing, with a complement of 60 men, is under naval guard at the Hampton Roads submarine base following the discovery and removal last night of a large quantity of liquor. An inquiry has been ordered by Rear Admiral Andrews, commandant of this naval district.

BANDITS AND MARINES HAVE DEADLY CLASH

(By Associated Press)

BUENOS AIRES, Nov. 26.—Four hundred well armed bandits, entrenched in the village of Paso Barro, state of Santa Cruz, have repulsed an attack by marines landed from the cruiser Almirante Brown, according to belated dispatches. A number of bandits and marines were killed or wounded during the engagement, in which the attackers used machine guns. The bandits held prisoners in the village a number of residents of the region, including English ranchers and S. J. Macleay, manager of the Armour packing plant near Santa Cruz.

ITALIANS ARE DISTURBED BY BRIAND'S TALK

(By Associated Press)

TURIN, Italy, Nov. 26.—Anti-French demonstrations which were precipitated last night following newspaper accounts alleging harsh words used by Premier Briand of France to Senator Schanzer, head of the Italian delegation at Washington, continued here today with such intensity that 300 troops have been called to restore order.

CAN'T PREDICT SOLUTION FOR IRELAND NOW

(By Associated Press)

TURINBRIDGE WELLS, England, Nov. 26.—Lord Chancellor Birkenhead, presiding at a mass meeting here today, said he could not confidently predict the Irish question will be satisfactorily solved. He said what the British government offered Sinn Fein was that, with one or two reservations, Ireland should be placed in exactly the same position as Canada. "Whether the offer will be accepted I cannot say," said the chancellor.

"It is very easy," he added, "to say, why don't you raise an army and coerce Ireland as the only means of obtaining peace? If such a tragic necessity were to arise, no British government would shrink from the responsibility, but when that had been done, how much nearer would we be to the attainment of a contented Ireland?"

LONDON PRESS WANTS NO MORE IRISH WARFARE

(By Associated Press)

LONDON, Nov. 26.—A chorus of vigorous protests against renewal of warfare in Ireland in the event the present peace negotiations collapse is raised by morning newspapers today after the meeting yesterday of Premier Lloyd George and Sir James Craig, the Ulster premier.

BIG SHORTAGE IS ALLEGED IN ILLINOIS SUIT

(By Associated Press)

SPRINGFIELD, Ill., Nov. 26.—Suits for an accounting against five former state treasurers, alleging shortages of approximately \$2,500,000 have been started by Attorney General Brundage. The suits cover six terms preceding that of the present trustee, Edward E. Miller. The other former treasurers involved are Governor Len Small, Lieutenant Governor Fred E. Sterling, William Ryan and Edward T. Mitchell.

SHELLS FROM STATES FOUND TO BE UNFIT

(By Associated Press)

MADRID, Spain, Nov. 26.—El Sol today published a semi-official declaration which also appeared in Barcelona newspapers, stating that all ammunition acquired in the United States for use in the Moroccan campaign was found to be unfit for use. An authoritative source is responsible for the statement that the Spanish army purchase commission in the United States acquired discarded stocks with the full knowledge of their quality, and that the Spanish inspectors passed them.

1200 LEVEL IS ATTAINED IN DIVIDE SHAFT

The deep shaft that has been under way in the property of the Tonopah Divide Mining company has reached the 1200-foot point, and work will now be started on a station at that point. This shaft will be pushed to water level before any intensive campaign of level development is undertaken by the company.

The report of operations for the week ending November 23, in addition to the work of shaft sinking, as given out officially by Superintendent William Watters, follows:

"Drift 1001 extended 23.5 feet. Raise 305 carried 5 feet. Raise 313 carried 23 feet. Raise 305 carried 20 feet. Raise 829 carried 9 feet.

Conditions at the property are excellent at the present time, the regular shipments of approximately 50 tons daily being sent out to the Belmont mill.

EDUCATION WEEK IS SET FOR DECEMBER

In support of the program instituted by the American Legion and other bodies and associations interested in education and in the development of a spirit of 100 per cent Americanism, Governor Emmet D. Boyle has issued a proclamation designating the week of December 4 to 10 as American Education week.

The Nevada executive calls upon the people of the state to take cognizance of the plans being made nationally for the observance of the week, and to assist the agencies that will be at work at that time in their endeavor to foster and perpetuate the ideals of our country along the lines of a better understanding of what America means, particularly as they affect the foreign-born who are with us.

BETTS TO PURCHASE MINE EQUIPMENT

B. F. Betts, principal owner of the phenomenal lease at Royston which bears his name, is a Tonopah visitor. He is here for the purpose of making arrangements for a 15 h. p. engine and gallows frame to be taken to the property in the new camp.

The shaft on the property has reached a depth of 30 feet, said Mr. Betts, and the ore that is coming from the workings is running \$700 to the ton.

DAYTIME HAUL NETS ROBBERS \$60,000 GEMS

(By Associated Press)

ST. LOUIS, Mo., Nov. 26.—Four armed bandits today entered the offices of the St. Louis Refining company in the heart of the business district, and escaped with diamonds and other jewels said by company officials to be valued at \$60,000. As the bandits escaped in an automobile they fired a several shots, apparently to intimidate probable pursuers.

RAID MADE BY FRISCO POLICE IN FULL DRESS

(By Associated Press)

SAN FRANCISCO, Cal., Nov. 26.—Attired in evening dress, opera hat and cape, accompanied by seven policemen in full dress uniforms with white gloves, Police Captain Goff led a raid last night on a supposed gambling club. The raid was a full dress affair, Goff explained, because the manager of the club complained on Goff's last visit that he was not dressed well enough to mingle with the club members. Sixty men were arrested and taken to jail in a common patrol wagon.

NAVY VICTOR OVER ARMY IN ANNUAL GAME

(By Associated Press)

NEW YORK, Nov. 26.—The United States naval academy football team defeated the West Point army rivals in the annual football game at the Polo Grounds here, 5 to 0. The game was played in a steady rain on a slippery, muddy field. Both teams were stronger on the defensive than on the offensive, but the Midshipmen had the scoring punch when opportunity opened in the second period.

DEFENSE WILL CLOSE FATTY'S CASE MONDAY

(By Associated Press)

SAN FRANCISCO, Cal., Nov. 26.—The defense will close Monday in the Arbutuck trial, Gavin McNaughton, his chief counsel, announced in court today. Harry B. Barter, a rancher of the Stockton district and friend of Virginia Ruppe, took the stand at the opening of court for completion of his cross-examination begun yesterday.

SEVEN TROUGHS TO BE RESURRECTED

L. A. Friedman, mining magnate of Lovelock, spent Sunday at the Golden hotel in Reno. There is rumor current that Mr. Friedman and his associates are planning to install a system of deep mining at Seven Troughs for the purpose of operating the Friedman properties there. It is believed that that famous gold producer of the past will be restored to its old-time glory and that by the system proposed that deep mining can be made a success and it will become once again one of the great producers of the precious metal in Nevada.

LAST OF BRITISH ARMY QUITS FRANCE

(By Associated Press)

CALAIS, Nov. 26.—Seven officers and 366 privates, the last of the 4,500,000 men constituting the British expeditionary forces, have embarked for England after an absence of seven years. The farewells on the quays were extremely cordial.

TONOPAH EXTENSION ORDERS BIG PUMPS FOR MCKANE SHAFT

A new pumping plant, to handle the water recently developed in the McKane shaft workings, has been ordered by the Tonopah Extension Mining company from the Aldrich Pump company, of Allentown, Pennsylvania. The new outfit will consist of two vertical triplex pumps of 600 gallons capacity per minute for each pump. These pumps will be placed on the 1540 level of the McKane shaft and will pump the water direct to the surface through a 16 inch column. Each one of the pumps will be driven by a 225 h. p. motor.

During the week ending November 25, a total of 338 feet of level development work was accomplished. Excellent results are being obtained from the work in the lower levels of the mine, good ore being encountered as drifting progresses. Development is officially reported for the past week follows:

No. 2 Shaft:

"600 Level—644 crosscut advanced 20 feet in West End rhyolite.

McKane Shaft:

"1200 Level—1202 crosscut advanced 32 feet in West End rhyolite.

"1540 Level—1510 raise advanced 15 feet with no change. Widening of 1517 crosscut was continued.

Victor Shaft:

"1600 Intermediate Level—Work was resumed in No. 1 east drift, Aldrich vein. Stoping is in progress on the Mercer vein.

"1600 Level—1614 crosscut was continued in Extension breccia and on a small vein showing 2 feet of milling ore. 1615 east drift advanced 15 feet in low-grade quartz. 1615 west drift advanced 4 feet in low-grade quartz. Stoping is in progress on the Mercer, Murray, Belmont and Victor veins.

"1700 Level—1701 crosscut advanced 30 feet in West End rhyolite. 1710 raise, Mercer vein, holed in the east intermediate drift from the 1700 crosscut. 1715 east drift on Murray vein, 1740 drift, branch advanced 12 feet on 4 feet of ore. No. 2 raise from 1745 west slope advanced 6 feet on 6 feet of ore. Stoping is in progress on the Murray and Mercer veins.

"1800 Level—1801 crosscut advanced 45 feet in Extension breccia. 1800 west drift, Aldrich vein, was continued on low-grade ore. 1802 west drift, Aldrich vein, advanced 22 feet on 3 feet of good ore. 1802 raise, Aldrich vein, advanced 18 feet on 4 feet of good ore."

WITH TWO SHAFTS AT WORK WEST END IS CONSISTENT SHIPPER

Excellent results are being obtained from the steady work being prosecuted at the properties of the West End Consolidated Mining company. During the week a bullion shipment consisting of 25 bars of precious metal was shipped from the mill, the estimated value of which was \$54,579. This represents the clean-up for the first half of November.

During the course of development work this week 1500 tons of ore was shipped to the mill. Mine and mill are in a satisfactory condition and values are holding up in good fashion.

The official report issued by the management this morning for the week ending November 26 follows:

West End Shaft:

"From the West End shaft, 413 crosscut A has been stopped and raise 413C started from near the face. The raise is in the footwall of the vein and is passing through allied Mizpah trachyte. Stoping has been started above the 413 west drift.

"From the 500 level, 516 drift was driven ahead in low-grade vein material. Drift 530 No. 2 has begun to show commercial values across a narrow width and a raise will shortly be driven from this level to a connection with the 536 drift for mining and ventilation purposes. Intermediate drift 683 has passed from rhyolite into trachyte without any particular change in conditions, the face still being in the footwall of the vein. The usual progress was made in raise 968 without any change to report.

Ohio Shaft:

"From the Ohio shaft, raise 559 has been stopped as the hanging-wall of the vein was reached. There is no change to report in the 555 raise 18, as it has not yet reached a height where the projection of the Hanging-wall vein should be cut.

"On the 800 level, raise 870 and crosscut 862 made the usual progress. Work will be resumed in 863 raise during the coming week. Work has again been resumed in 1106 raise without change to report. The regular footage was made in Tonopah Seventy-Six workings, with no particular change to report. Tonnage and grade of ore mined from

IMPROVEMENT IN CONDITIONS IN ORLEAN MINE

The following message was received this morning from A. L. Davis, general manager of the Orlean Consolidated Mining company:

"Southern drift now on 75 feet. Has shown gradual improvement. Conditions yesterday indicate 2 feet of 410 ore and 4 feet of 429 ore."

The drift above referred to is the one started some time ago on the 700-foot level, and which entered the extension of the ore shoot encountered on the 600 level. There seems to be no limit to the distance that this drift continues to be 'still in ore' and the latest showing is more than encouraging for the well-known property.
